Volatility Statement for PRS10

The PRS10 contains various types of memories, as listed below:

Non-Volatile Memory:

512 Bytes EEPROM	User modifiable;
	Contains instrument's settings
	<u>To clear:</u>
	Send command "RC1"
20 kB EPROM	Not user modifiable
	Contains instrument firmware

Volatile Memory:

768 Bytes SRAM	User modifiable
	Used for operation/user settings.
	<u>To clear:</u>
	Send command "RS1"

Please feel free to contact SRS should you have any further questions.
